Hardworking storage solution

Share It supports individuals and groups with hardworking storage solutions that offer workers choice and control over their environment, while increasing the efficiency of the real-estate.

High-modularity storage

The Share It range is a comprehensive solution that meets the needs of resident, social, meeting, nomadic and resource center zones.

The diverse portfolio answers individual and team needs, supporting knowledge sharing.

It offers efficient space structure and acoustic properties in open spaces. In private offices, it also provides a high level of customisation, offering various options.

Helping people concentrate

Noise disturbance is one of the greatest threats to concentration performance. Recent research done at the University of California shows that it can take up to 23 minutes to regain concentration after being distracted at work.

The combination of Share It and additional acoustic back panels minimises sound pollution and creates privacy for comfortable, decisive working.

Share It provides state of the art acoustic properties. The best results are achieved by combining an acoustic front with acoustic back panels in melamine and fabric.

Structure for team spaces

Thanks to its modularity, Share It makes it easy to structure team spaces. Cupboards for personal and team storage can be used back to front as space dividers. Communication areas can thus be placed conveniently close to focus areas.

It also helps users to balance privacy and contact with others, even in a large team space.

Supports collaboration

Collaboration is important. Informal discussions in the office are often a source of new ideas and creativity.

The Share It meeting point facilitates easy access to relevant information and knowledge sharing, with its integrated storage and power outlets.

Share It offers many different combinations to support instant collaboration. Medium-height cupboards are particularly convenient for impromptu meetings.

Glass fronts can be written on to create dynamic and interactive areas for meetings.

D3083 | SHARE IT PERSONAL LOCKERS (WY/CC)

Secured space

New technologies are making people more mobile in the office and in their working lives in general. Individual spaces at work are shrinking and yet research shows that personal space is incredibly important to people.

Share It offers secure lockers for dedicated personal storage or shared use, providing complete peace of mind.

ARCHIVED STORAGE

Information and objects infrequently accessed find their place in archived storage solutions nearby, or further away.

ACTIVE STORAGE

Active material is used daily. It must be kept visible, on or above the desk.

ANTICIPATED STORAGE

Material needed at least once a week, for referencing or work waiting to be done, should be kept at hand's reach, above, under or close to the desk.

Minimal effort for maximum organisation

Our research on ergonomics shows that you can improve performance and efficiency by providing flexible systems which support active, anticipated and archived storage.

Share It offers a wide range of smart internal fittings to optimise the storage capacity and help users file, retrieve information and objects without wasting time.

STATEMENT OF LINE

CLOSURE TYPES

DIMENSIONS

Heights on plinth (units on frame reach taller heights). * On glides.
 Depths: D434mm, D334 and D626mm also available on certain units.
 Widths: W400, 600, 800, 900, 1000, 1200, 1600mm, depending on the units.

HANDLES

Large selection of handle types available.

* Not for lacquered glass

SURFACE MATERIALS

Surface materials shown in brochure:

Colours are only representative and may vary slightly from actual material.

SUSTAINABILITY

DESIGNING FOR THE ENVIRONMENT REQUIRES INNOVATIVE THINKING AND SOLUTIONS.

LIFE CYCLE ASSESSMENT

During the product development process, we consider each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of life.

Thanks to the Life Cycle Assessment (LCA) method, Steelcase quantified Share It environmental impacts to set the stage for further improvements.

This method, based on ISO 14040 and 14044 and selected by The European Union for environmental evaluation, allows us to quantify the environmental impact of our products throughout their entire lifecycle.

MATERIALS

57% recycled materials, by weight (38% pre-consumer + 19% post-consumer).

Product is PVC-free.

Low formaldehyde emissions of wood based panels according to ISO 16000 (<20µg/m³).

Packaged with 80% recycled cardboard that uses water-based inks without solvents.

PRODUCTION

Manufactured in Stribro, Czech Republic by Steelcase.

Uses powder-coat paints: VOC-free and free of heavy metals.

Water-based adhesives used in manufacturing.

TRANSPORT

Made in Europe, close to customers.

USE

Designed for a long product life, with replaceable parts.

Materials meet stringent health and indoor air quality criteria.

Maintenance information available on steelcase.com

END OF LIFE

99% theoretically recyclable by weight.

Designed for quick and easy disassembly of materials.

Plastic parts clearly labelled for easy sorting and effective recycling, according to ISO 11469.

100% theoretically recyclable packaging.

Designed to enable responsible end of use strategies - refurbishing, charitable donation or recycling.

CERTIFICATIONS

To show continuous improvements, we communicate Share It environmental performance through voluntary environmental labels and declarations.
